Optimization Innovation Energy saving

Zhangjiagang AiBiM Technology Co.,Ltd located in the golden mile of Yangtze River delta,only 100km to Shanghai.With more than twenty years experience in manufacturing plastic machines.we are professional in making injection blow molding machine & blow molding machine & mould.

Our machine is suitable for general material PE PP PS EVA TPU ABS PLA ; PET PETG PCTG TRITAN etc. Our machine received high praise by customer.All through these years,we have already exported many machines all over the world.If you can send the sample or drawing(including the output you required),we will choose the suitable machine for you.

AIMSEA

One of the best brand and reliable environmental friendly stabilizer

**High quality transparency,
Low VOC PVC Product
Solution Provider**

WIRE&CABLE

- Low moisture absorption
- Good electrical performance
- Excellent Congo red Duration

PVC Floors,Walls and Ceilings

- Good processing Performance
- Low plate out

Transparent&flexible PVC

- Excellent transparency
- EU environmental protection non-tin
- Low dosage
- Odorlessness

PVC Pipes&Fittings

Environmental Friendly PVC Solutions

- Good Cost Performance
- Excellent processing performance
- Low late out

PVC Profiles

- Good weather stability
- Excellent initial coloring
- Low plate out,wide processing range

Foaming PVC products

AIM-FOAM

- Excellent Whiteness

PVC Medical Equipment

- Meet national medical standard GB15593-1995, comply FDA certificate.
- No phenol, good weather resistance
- No plate out, No atomization

Tin-partner

- No harmful heavy metals
- No phenol
- Meet REACH standard .Completely environmentally friendly

Main Products:

Oleamide, Erucamide,
Stearamide, Behenamide,
Ethylene Bis Stearamide(EBS)
Ethylene Bis Oleamide(EBO)
Pentaerythrityl tetrastearate(PETS)
Octadecyl Erucamide

Application:

About Us : Jiangxi Zhilian New Materials Co., Ltd. is one of the largest manufacturers of oleamide, erucamide, and stearamide in China. With support from professional science research institute and independent research and development, with innovated process technology and advanced production equipment. company is committed to research, develop, produce and promote application of high efficient, environmental-friendly and functional additives in functional master batch like rubber and plastic and color master batch, printing ink, coating, leather and cable, such as anti-blocking, slipping, anti-sticking, dispersing, de-filming, brightening, leveling and anti-static. Company has been awarded titles, such as provincial non-public scientific and technological enterprise, and is the main enterprise formulating national industrial standard of oleamide. It has passed ISO9001-2008 Quality System Authentication and SGS inspection, is in accordance with EU ROHS and Reach, and is Tier One supplier of Sinopec, CNPC and CNOOC. Customer focus and market oriented. We satisfy the customers demand by excellent products and credit service with twenty years' experience and toughening. Zhilian will develop and create resplendence with you together!

LookingPlas.com

The Platform & Source to Plastic Industry

Focus on Plastic Industry

LookingPlas has three main categories:

- Plastic Machinery
- Mould & Dies
- Raw Materials & Additives

Accurate Matching

Professional sourcing consultants in plastic industry will match your detailed product requirements to manufacturers.

Quick Feedback

LookingPlas arrange both online and offline customer service to meet global buyers. Supply one-stop sourcing solutions to different requirements.

PLASTIC INJECTION MOLDING MACHINE

Company Profile

Ningbo Haijiang Machinery Manufacturing Co., Ltd. is a professional manufacturer of plastic injection molding machines located in Ningbo, China. Our company was established in 1992 and has more than 30 sales agents all over the world. We can offer a wide range of injection molding machines including standard, injection blow, clear/mix color, BMC thermoset, and more. The machine range shot weight varies from 45 grams to 40000 grams, while the clamping force ranges from 200KN to 30000KN. The HJK/HJF machine series have been sold all over the world and have gained many long-term cooperative clients. In order to better serve customers, our company has set up agents in various countries such as Russia, Brazil, Pakistan, Turkey, Iran, America, Nigeria, and more. This ensures that local customers receive professional and timely service. Additionally, we can provide customized machines based on the specific needs of our clients and the plastic products they manufacture.

MULTILAYER CO-EXTRUSION BLOWN FILM MACHINE

ADVANTAGES

1. Effectively reduce the cost of film formulation and enhance the competitiveness of customers' products;
2. Adapt to the diversification of formula/raw materials in various regions;
3. Up to 700kg/h, consumption less than 320kwh/ton;
4. Automatic air ring and automatic weighing dosing system to improve the quality of film products;
5. The new surface center winding system effectively reduces the deformation of the film.

HIGH STANDARD HIGH DEMAND HIGH QUALITY

Continue to provide you with high-quality flexible packaging intelligent equipment

Guangdong Costar Machinery Technology Co., Ltd. stands in the film-blowing machine industry as a well-known company in China and plays a proactive and inspiring role in promoting the industry.

Mr. Zhang Yuanjiang, the chairman of Costar, has been focusing on the film blowing machine industry for 30 years. Founded in 2007, Costar has been committed to meeting the needs of customers, and improving ourselves technically, with multi-layer co-extrusion film blowing machines developed over time like 3-layer, 5-layer and 7-layer co-extrusion film blowing machines. which are suitable to produce various high-precision flexible packaging films, widely used in the packaging for food, pharmaceuticals, industry, chemicals, building materials and other packaging in other sectors.

Costar upholds the vision of constantly tackling technical bottlenecks to help customers produce smoothly and create higher value. For this vision, Costar will deliver higher quality and better service. During continuous learning and innovation, Costar will launch more energy-saving, more efficient, more valuable products, and impress customers with quality.

PET Sheets Twin-Screw Extrusion Line

Main Parameters:

PET Sheets Extrusion Line utilized twin-screw extruder.
Main layer raw material: A-PET PTEG (regrind and/or virgin)
Coextrusion layer raw material: EVOH, PE (virgin)
Sheets thickness range: 0.15-1.5mm
Sheets width: 600-1300mm
Output range: 400-500kg/h

PET Sheets applications include but are not limited to:

- Flexible packaging
- Food contact applications
- Plastic cards
- Medical packaging
- Electronic applications
- Other applications

PP、HIPS Sheets Extrusion Line

Main Parameters:

Main raw material: PP and HIPS (regrind and/or virgin)
Coextrusion material: PP, HIPS, EVOH, PE (virgin)
Sheets thickness range: 0.18-2.0mm
Sheets width: 600-1200mm
Output range: 350-500kg/h

PP, HIPS Sheets applications include but are not limited to:

- Flexible packaging
- Food contact applications
- Yogurt pots, vending cups, buckets, and bowls
- Medical packaging
- Refrigerator linings
- Other applications

PC、PMMA、GPPS Solid and Corrugated Sheet Extrusion Line

Main Parameters:

Main raw material: PC (regrind and/or virgin)
Coextrusion material: UV (virgin)
Sheet thickness range: 1-20mm
Sheet width: 2100mm
Output range: 400-600kg/h

PC Hollow and Solid Sheet applications include but are not limited to:

- Construction (roofing, cladding, glazing, roofing skylite)
- Advertising (light boxes)
- Canopy for the window
- Ceilings covering
- Industrial roofing, Verandas, Walkways, Parking Areas, Swimming Pools, Stadium
- Other applications
- Greenhouses
- Interior decoration

PE/PP COMPACTOR PELLETIZING MACHINE

Introduction:

PE/PP recycling granulating machine is special equipment for the PE PP film and bags recycling granulating, it equipped with compacting machine which could pre-compact the film into smaller granules, then easily feed into screw barrel of extruder, its efficiency is high and can improve production capacity and save labour cost. It has two vacuum exhausting mouth on extruder barrel which can fully vent the moisture in the material and hence the final granule quality will be very perfect. At the end of screw barrel, it equipped with double post fast speed hydraulic non-stop screen changer which can effectively take out the dirty in the plastic melt. The pelletizing adopts watering cutter which is easier to operate, and the shape and appearance of granule is good.

Technical Parameters:

Model of PE/PP plastic pelletizing line	SJ85	SJ100	SJ130	SJ160
Extruder screw diameter	85	100	130	160
Main motor of extruder	55	90	132	160
Main motor of compacting machine	37	55	90	110
Production capacity	150-200	250	300-400	500-600

COMPANY PROFILE

Zhangjiagang sevenstars machinery is located in Zhangjiagang city, China, a beautiful and famous city for all kinds of plastic machine.

We have 17000 square meters land and new modern workshop, we mainly development, design, manufacture and marketing plastic recycling machine and plastic extrusion machine.

Jiangsu Qingfu New Material Technology Co., Ltd. is a high-tech enterprise integrating research and development, production, sales and service. The company was founded in 1986 with a registered capital of 36.8 million yuan and a total investment of 1.03 billion yuan. The company covers an area of 81.5 acres, with more than 30 years of industry technology accumulation, mainly engaged in the development and production of PVC environmental protection heat stabilizer products, plastic additives production capacity ranks first in the world. In order to better serve domestic and foreign customers, based on the advantages of low cost of local raw materials in Penang, Malaysia, with better competitiveness, we plan to establish a production base of about 60 acres in Penang, Malaysia, with a production scale of 200,000 tons of calcium and zinc stabilizer.

The main production: calcium zinc stabilizer, PE wax, PVC lubricant, etc. In order to optimize the overall solution, the company also provides supporting service products: CPE, ACR, PVC toughening and impact resistance additives. Products are widely used in pipe fittings, profiles, plates and other industries. Company strength and product quality recognized by the industry.

We have a professional R & D team, equipped with advanced testing instruments and experimental equipment at home and abroad.

NANJING HIGH EFFICIENCY NEW MATERIAL TECHNOLOGY CO.,LTD.

KOYEE SINGLE-LAYER NON-GLUE ECO-FRIENDLY PAPER STRAWS

LEAD THE NEW LOW-CARBON AND ECO-FRIENDLY TREND!

Product advantages:

- ◆ Non-glue, water based coating paper
- ◆ Recyclable, direct pulping paper
- ◆ Super durable with coffee and cola
- ◆ Low carbon and environmentally friendly
- ◆ Patented technologies
- ◆ No need professional composting
- ◆ Comes from dust-free workshop

Applicable for:

Office: Stylish

Special groups: safe and secure

Travel: pollution-free and planet-friendly

2024 CHINA INTERNATIONAL PLASTICS EXHIBITION

China
New
Plastics
2024

THE 6TH EXHIBITION of New Plastic Materials, Technologies, Equipment and Products

Time: 1-3 November 2024

Location: Nanjing International
Expo Center

Guidance: China National Light
Industry Council

Organizer: China Plastic Processing
Industry Association

EXHIBITION INTRODUCTION

- China International Plastics Exhibition is a significant industry event created by China Plastic Processing Industry Association. Since its establishment in 2014, it has been successfully held for five times and gained high praises and widely recognition by the industry.
- The exhibition is held every two years. The last (fifth) exhibition gathered a large number of innovative, industrial, and market resources to build a one-stop exchange and display platform through collaboration. Nearly a thousand exhibitors gathered in Nanjing, with an exhibition area of nearly 50000 square meters. The third China Plastics Industry Science and Technology Conference and over 40 series professional conferences were held simultaneously. The exhibition has achieved significant results, and the satisfaction of visitors and exhibitors continues to increase.
