SEVENSTARS
PLASTIC MACHINERY

www.sevenstarsgroup.cn

Chinaplas2024 Booth No.:

NF42 North Hall

Compactor pelletizing machine

Suitable for all kinds of LDPE, HDPE, CPE, PVC, TPU, PLA, Biodegradable plastic, and etc

Plastic Shredder

Suitable for Large PVC pipe, hard plastic block, big plastic bucket, plastic chair and furnitures.

Applications

PLASTIC BOTTLES

PLASTIC PIPES

PLASTIC LUMPS

PLASTIC BUCKET & TRAY

NYLON ROPE

PLASTIC PROFILES

PLASTIC FILM

PP BAGS

NINGBO ACNOVO SMART DEVICE CO., LTD.

PET PREFORM SPECIAL MACHINE

CN-PET preform special machine is customized according to the special molding process of PET plastic machine, screw length-to-diameter ratio increased to 1:25, and the use of wavy design, increase the servo power system, increase the charging motor, making the forming more stable, more efficient.

▶ PRODUCTS

▶ COMPANY PROFILE

Ningbo ACNOVO Smart Device Co., Ltd. is located in BEILUN Ningbo city nearby BEILUN port, with 5000 square meters of production plants. It is a high-tech cooperative enterprise with full technical guidance and quality supervision from Taiwan Acnovo Machinery Tech Co., LTD. The company is committed to high quality injection molding machine and plastic industry special injection molding machine research and development and manufacturing, the main products are: high-performance servo energy-saving injection molding machine, crate special injection molding machine, PET preform injection molding machine, Thermoset injection molding machine and so on.

公司占地面积50余亩，生产车间面积15000m²，是一家专业从事塑料加工成套设备的产品研发、生产和销售的高新技术企业。公司拥有行业先进美国法如FARO三维坐标检测设备，数控加工中心20台，关键零部件均为自主设计及制造，保障了产品的优良品质。

The company covers an area of more than 50 acres, the production workshop area of 15,000 square metres, is a professional engaged in the plastic processing equipment product development, production and sales of high-tech enterprises. The company has the industry's most advanced U.S. FARO three-dimensional coordinate testing equipment, 20 sets of CNC machining centres, key components are designed and manufactured independently, to ensure the excellent quality of products.

NEW MODEL Released! - Auto Hemming Machine

To be the Leader of Liner inserting, cutting & sewing machine in the world, we keep on Going!!!

Bag Mouth-Liner Hemming Machine For Woven Bags

◀ MODEL NO.:PS-H650

Main Feature

Woven Bag Width	470-650mm	Liner wider than Woven Bag	350-750mm
Woven Bag Length	750-1050mm	Liner Length	φ1200mm
Liner Longer than Woven Bag	30-110mm	Production Speed	14-18pcs/min

PE Film Cutting & Inserting & Sewing Machine

◀ MODEL NO.:PS-CIS750

Main Feature

Max Fabric Width	350-750mm	Liner Thickness	0.015-0.05mm
Max Fabric Width Without Liner	≤760mm	Cutting Accuracy	±1.5mm
Outer Bag Cutting Length	600-1300mm	Folding Width	15-30mm
Max Liner Length	≤1250mm	Stitch Range	7.0-12mm
Liner Width	+20mm(Liner Wider Than Outer Bag)	Production Speed	24-36pcs/min

Cutting & Sewing Machine For Woven Bags

◀ MODEL NO:PS-QF800

Main Feature

Cutting Accuracy	±1.5mm	Fabric width	350-750mm
Stitch Range	7-12mm	Max Diameter of Fabric	φ1200mm
Production Speed	24-45pcs/min	Cutting Length	600-1300mm

- **Creative** – the first liner inserting machine was made in Shantou Pea Shin in 2015
- **Quality** – More than 2,000 sets of liner inserting cutting and sewing machine keep running in the world day and night!
- **Experience** – with the number of machines working in the world, we have plant of experience to different types of PP fabric/ PE material, based on it, we can meet all the requests to the customers around the world!

COMPANY PROFILE

Our company is a high-technology enterprise that integrates design, manufacturing, and sales of 'HuangGuan' cap making equipment. We also have a strong technical team with expertise in designing and developing various molds and machines that meet different customer requirements, thanks to the precision CNC machines and CAD/CAM/CAE technologies that we have introduced and utilized. We have also invested millions of dollars in mold coating from Europe to ensure that our molds are the best in China. Currently, our production of cap making equipment has been standardized, normalized, and placed on a scientific administration track. We strive to provide higher efficiency and greater perfection in our production for all our customers in the future.

优质的螺纹元件是保证塑料机械高效工作的基本条件之一

High-quality threaded components are one of the basic conditions to ensure the efficient work of plastic machinery

螺纹元件作为挤出机的关键零部件，其结构和品质直接影响设备的工作效率和制品品质。玻璃纤维、碳酸钙、滑石粉等作为硬质强化介质在改性工程塑料、色母粒等领域被广泛应用，对挤出机零部件材料耐磨性和韧性有极高要求。

As the key parts of extruder, the structure and quality of threaded components directly affect the working efficiency of equipment and product quality. Glass fiber, calcium carbonate, talc powder and other hard strengthening media are widely used in modified engineering plastics, masterbatch and other fields, which have high requirements for the wear resistance and toughness of extruder parts materials.

根据实际生产环境,甄选最适合的原材料

Select the most suitable raw materials according to the actual production environment.

根据实际尺寸要求,量身定制,确保精密

According to the actual size requirements, custom-made ensure precision.

采用严苛规范的热处理工艺,保证品达到最优的物理性能

Adopt strict specification of heat treatment process to ensure the best physical performance of products.

全程自主生产,质量可控

Independent production, quality control

新乡威韧6542螺纹元件保证

Xinxiang Weren 6542 threaded components guarantee

1200-1250°C真空淬火,550-570°C最少三次回火回火硬度严格控制在HR60-HR62

1200-1250°C vacuum quenching, 550-570 °C at least three times tempering.

The tempering hardness is strictly controlled in HR60-HR62

新乡威韧Cr12Mov螺纹元件保证

Xinxiang Weren Cr12Mov threaded components guarantee

1000-1050°C真空淬火,380-400°C最少两次回火回火硬度严格控制在HR60-HR62保证工件在高温使用环境下的耐磨性和强韧性

1000-1050°C vacuum quenching, 380-400°C at least two tempering.

The tempering hardness is strictly controlled in HR60-HR62 to ensure the wear resistance and toughness of the workpiece under high temperature use environment

多次回火的目的不仅是消除淬火应力和降低M中过饱和的含碳量提高工件的韧性,关键是在每一次的回火中,M和残留A中碳析出后形成细粒碳化物,使残留A中的碳含量降低,导致工件Ms点升高,这样可以在每一次加热后的冷却过程中,使残留A更易转变成M,经多次反复回火时,残余A减少A不仅使工件性能稳定,同时在每次加热过程中将上一次转变成的M又进行了回火。所以一次长时间的回火是达不到多次回火的目的。

The purpose of multiple tempering is not only to eliminate quenching stress and reduce the oversaturated carbon content in M to improve the toughness and plasticity of the workpiece, the key is that in each tempering, the carbon in M and residual A precipitates to form fine-grained carbide, so that the carbon content in residual A is reduced, increasing to the workpiece MS point, so that in the cooling process after each heating, the residual A is more easily transformed into M. After repeated tempering, the reduction of residual A not only makes the workpiece performance stable but also tempered the M converted into the last time during each heating process. Therefore, a long time of tempering is not able to achieve the purpose of multiple tempering.

ANTISTATIC AGENT

Company Profile

In 2000, Dechang developed and produced HDC Antistatic Agents series successfully. HDC Antistatic Agents series are typical kind of nonionic antistatic agent, with excellent heat stability and antiaging property; on the basis of successful applications of non-ionic Antistatic Agents, we also developed ionic anlistatig for external paste and anlistatig with properties both of ionic surfactant and non-ionic surfactant. The products are widely used in BOPP, PP, PE, PU, PVC, ABS, PS and their products, etc. HDC series can greatly reduce the surface resistance of plastic products to $10^8-9\Omega$, with such advantages as high-efficiency and permanent antistatic performance, good compatibility with resin, appropriate migration speed of antistatic molecules, no bad effects on the process and use performances of products. At present, our products got the certificates of ROHS and PFOS, With an annual output of 2,000tons, Dechang now is one of popular plastic Anlistatig manufacturers in China and establishes close cooperation relationships with more than 400 institutes and processing enterprise in plastic & rubber industry of China;

永泰运化工物流股份有限公司
YONGTAIYUN CHEMICAL LOGISTICS CO., LTD.

Stock Abbreviation: Yongtaiyun

Stock Code: 001228

01 COMPANY INTRODUCTION

Yongtaiyun Chemical Logistics Co., Ltd. is a modern service enterprise mainly engaged in cross-border chemical logistics supply chain service.

The company is committed to continuously integrating internal service resources such as offline international chemical logistics service team, hazardous chemicals warehouse, hazardous chemicals transport fleet, and park-oriented integrated logistics service base as well as external cooperation resources such as international shipping, customs services, third-party warehousing and fleet. Based on the mode of "+ Internet" and the intelligent logistics supply chain service platform of "SHIPCHEM.COM", the company, professionally, safely and efficiently, provides customers with the whole chain cross-border chemical logistics supply chain services including logistics scheme design, inquiry and booking, tallying services, domestic transportation, warehousing, customs declaration and inspection, documentation services, port services, international shipping and logistics information monitoring.

Currently, the trade supply chain has conducted business in the fields of pesticides, chemical materials, new energy, etc. In the future, we will be committed to building a hazardous chemical trade supply chain with Yongtaiyun characteristics, and provide more comprehensive and detailed services to our customers by means of innovating business models, optimizing process management, and strengthening risk control.

02 CORE BUSINESS

03 SERVICE ADVANTAGES

- Whole-supply-chain services
- Global routes
- An experienced team
- Online-and-offline integration
- Value-added services
- Advantages of integrated international and domestic port services

Smooth Circulation of Materials, Eternal Prosperity of Society

CHINAPLAS 2024: Shaping the Future of the Plastics & Rubber Industries

Expediting the Transformation from “Made in China” to “Innovated in China”

The year 2023 marked a turning point for China as doors reopened, revealing a multitude of opportunities and pathways. Under the resumption of normalcy, the economy grew at a rate of 5.2% in 2023, according to the National Bureau of Statistics of China. As the economy recovers, sectors such as automotive, consumer electronics, and e-commerce have regained momentum. At the same time, China's manufacturing industry is undergoing a remarkable transformation, shifting from its traditional “Made in China” reputation to embracing innovation with the concept of “Innovated in China”, gaining competitive advantage in the global market.

CHINAPLAS 2024, the region's foremost platform to promote latest market trends, breakthrough technologies and innovative solutions of plastics and rubber industries, will be staged at the National Exhibition and Convention Center (NECC) in Hongqiao, Shanghai, PR China, from April 23-26, 2024. It provides an excellent platform for buyers who are pursuing innovative plastics and rubber solutions to enfold the accelerated industrial transformation, enhancing new advantages and new momentum for high quality industrial development.

Keep Abreast of the Industrial Transformation

The new generation of information technology, new energy, bio manufacturing, commercial aerospace, and low-altitude economy are rapidly developing in China. The export performance of China's “new three”— solar panels, lithium-ion batteries, and electric vehicles is particularly impressive. China's high-tech industries enjoy a growth and experience breakthrough in recent years. In 2023, the capacity of renewable energy facilities has exceeded 1.45 billion kilowatts and has surpassed coal power for the first time. Among these, wind power installation reached 440 million kilowatts, maintaining its position as the world leader for the 13th consecutive year, while photovoltaic power installation reached 610 million kilowatts, securing the top global ranking for the 8th consecutive year. The production and sales of new energy vehicles have ranked first in the world for the 8th consecutive year. China's first homegrown passenger jet C919 and large cruise ship Adora Magic City have marked their commercial operations.

These developments signal a positive outlook for market demand for plastics and rubber in China, generating substantial needs for high-performance plastics materials and technology throughout the country. This shifting landscape has magnified the importance of embracing the circular economy, digitalization and the significance of “Innovated in China”.

As a flagship event of plastics and rubber industries, CHINAPLAS 2024 will make full use of all 15 exhibition halls, providing over 380,000 square meters of exhibition area and gathering more than 4,000 industrial leaders from all over the world. CHINAPLAS continues to drive the growth and development of the plastics and rubber industries with a full range of innovative materials and mechanical technologies that are both advanced and cost-effective.

Putting Spotlight on Circular Economy and Driving Sustainability

Circular economy has gained immense importance worldwide as a key strategy for addressing environmental challenges and fostering sustainable development. It is of great prominence in the plastics and rubber industries, which have traditionally been associated with significant waste generation and environmental impact, revolutionizing their approach to production and consumption with transformative solutions to drive sustainability by promoting resource efficiency, waste reduction, and recycling. It encourages the adoption of innovative technologies for plastic and rubber recycling to produce high quality recycled plastics, creating a closed-loop system that maximizes the value of materials, enhancing a more sustainable and circular future.

Promoting the concept of circular economy remains an internationally recognized imperative and a key pillar of China's economic development strategy to achieve sustainable development of the industry. Prominent enterprises and companies in the world have committed to promote recycling and circular utilization of plastics. In recent years, the plastics and rubber industries have been making relentless efforts to facilitate the transition to a circular economy. Raw material and machinery suppliers have been continuously introducing new technologies for biodegradable materials, recycling, and sustainable solutions. In response to the various needs and interests of the industries, CHINAPLAS 2024 will gather innovative green solutions across 3 theme zones, including Recycled Plastics Zone, Bioplastics Zone and Recycling Technology Zone. Leading material suppliers and recycling equipment manufacturers including Veolia, Faurecia, ALBA, Esun, NatureWorks, Erema, Starlinger, NGR, Zerma, Sorema, Sesotec, Avian, Tomra, Jwell will showcase their solutions to support the industry's sustainable development goals. Global stakeholders will be invited to discuss latest plastic recycling trends and share insights in circular economy in the 5th Edition Plastics Recycling and Circular Economy Conference and Showcase which will take place on April 22 in Shanghai.

Unleashing the Potential of Digitalization in the Digital Era

Digitalization plays a pivotal role in transforming the industries, unlocking new possibilities and driving innovation in the digital era. Introducing smart manufacturing brings numerous benefits, including enhanced operational efficiency, improved product quality, and streamlined supply chain management. From smart manufacturing and automation to data analytics and IoT integration, digitalization enables real-time monitoring, data-driven decision-making, and predictive maintenance. It also facilitates the adoption of advanced manufacturing techniques such as additive manufacturing and robotics. By harnessing the power of digitalization, the plastics and rubber industries can optimize processes, reduce waste, and respond swiftly to market demands, ultimately fostering sustainable growth and maintaining a competitive edge in an increasingly digitalized world.

CHINAPLAS 2024 will introduce a full spectrum of smart manufacturing solutions and machinery in Injection Molding Machinery Zone with over 57,000sqm. Renowned global companies like Arburg, Kraussmaffe, Demag, Wittmann, Engel, Motan, Kawata, Matsui, Fanuc, B&R, Sepro, Beckhoff, Staubil and leading local suppliers Haitian, Tederic, Borch, Yizumi, Bole, Shini, LK, Topstar, etc. will demonstrate how digitalization can enhance efficiency, productivity and transformation of the industries.

For more information or enquires about CHINAPLAS 2024, please visit www.ChinaplasOnline.com or contact Chinaplas.pr@adsale.com.hk.

Showcasing Manufacturing Excellence: The Global Significance of "Made in China"

"Made in China" holds tremendous global significance in the plastics and rubber industries, symbolizing manufacturing excellence and the prowess of Chinese companies. Renowned for their cost-effectiveness and industrial capabilities, Chinese manufacturers have not only established themselves as key players but have also made significant strides in building world-class brands. The "Made in China" label now represents more than just affordability, it also signifies a commitment to innovation and the adoption of high-end technology. Companies in China are increasingly investing in R&D, pushing the boundaries of technological advancements across the plastics and rubber industries. By combining manufacturing expertise with cutting-edge technologies, industry professionals are driving industry growth, offering a diverse range of high-quality products, and solidifying China's position as a global leader in these industries.

This year, in response to the national and provincial policies, the exhibition will gather more than 850 enterprises which is recognized as "Professionalization, Refinement, Specialization and Innovation (PRSI)", of which over 250 have been awarded as a "Little Giant". The goal is to facilitate niche companies' innovations and promote the initiatives of the Government of the People's Republic of China in strengthening the cultivation of niche companies towards "PRSI".

Witness the Strong Comeback of CHINAPLAS to Shanghai

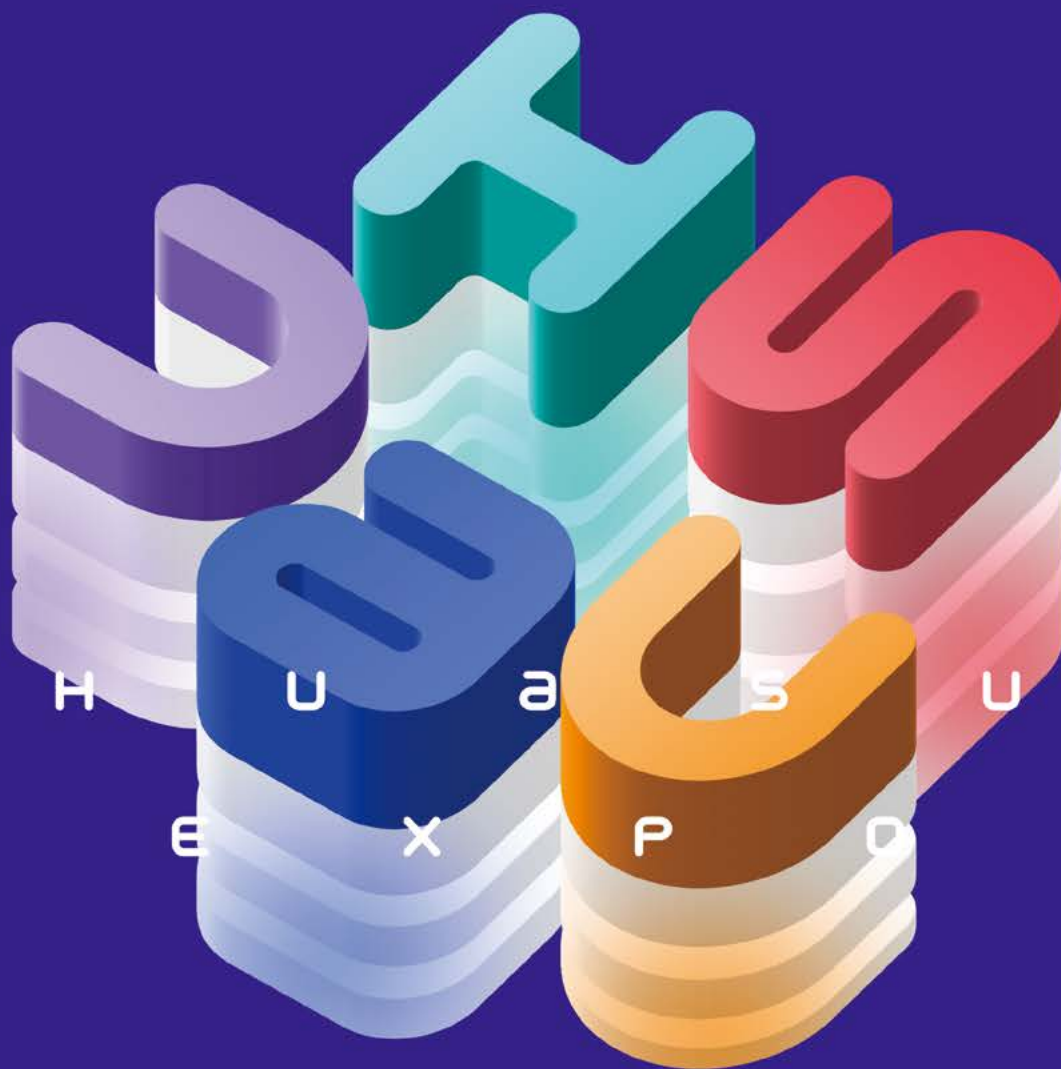

China's foreign trade is experiencing a consistent growth in both scale and quality. Chinese enterprises are proactively expanding into overseas markets, with a focus on the ASEAN countries aligning with their "going-out" strategy and the Regional Comprehensive Economic Partnership (RCEP). In response, CHINAPLAS team has spread its legs across Vietnam, Indonesia, Malaysia, India, Japan, Turkey, Egypt, Mexico, Germany, Italy and Taiwan Region, to invite local associations, enterprises and potential buyers to visit CHINAPLAS. Exhibitors at CHINAPLAS shall undoubtedly expect to discover and seize more new business opportunities on the fairground.

China has granted visa-free entry to citizens from France, Germany, Italy, the Netherlands, Spain, Malaysia, Thailand, Switzerland, Ireland and Singapore. Besides, China has also introduced new measures to simplify visa processes, making the trip to CHINAPLAS easier and more convenient. CHINAPLAS 2024 is ready to accommodate more international visitors in Shanghai.

2024 CHINA INTERNATIONAL PLASTICS EXHIBITION

China
New
Plastics
2024

THE 6TH EXHIBITION of New Plastic Materials, Technologies, Equipment and Products

Time: 1-3 November 2024

Location: Nanjing International
Expo Center

Guidance: China National Light
Industry Council

Organizer: China Plastic Processing
Industry Association

EXHIBITION INTRODUCTION

- China International Plastics Exhibition is a significant industry event created by China Plastic Processing Industry Association. Since its establishment in 2014, it has been successfully held for five times and gained high praises and widely recognition by the industry.
- The exhibition is held every two years. The last (fifth) exhibition gathered a large number of innovative, industrial, and market resources to build a one-stop exchange and display platform through collaboration. Nearly a thousand exhibitors gathered in Nanjing, with an exhibition area of nearly 50000 square meters. The third China Plastics Industry Science and Technology Conference and over 40 series professional conferences were held simultaneously. The exhibition has achieved significant results, and the satisfaction of visitors and exhibitors continues to increase.
